

PipeLine

Dedicated, Reliability, Solution

Providing one-stop
engineering services
and technical support

Leading regional
distributor of
fluid motion and
control products

COMPANY PROFILE

ABOUT US

Pipeline Process & Systems has been a solutions provider for process industries, offering comprehensive range of valves and instruments to clients in Singapore and regional countries since 2004.

We started out by launching our OEM and system integration for local and Multi-National Engineering & Construction companies, Engineering Procurement Companies (EPC), Governments, Industrial OEMs, Maintenance & Facilities, Mechanical & Electrical Contractors local contractors and Multi-National Engineering companies. Steadily and progressively, we moved on to expand our supply chains with our signature brand of 'Singapore' valves as well as representing products from well-established international brands from China, Germany, India, Italy, Singapore, Taiwan, United Kingdom and the United States.

Today, we pride ourselves in supporting a wide spectrum of customers seeking a one-stop service solution for project package. We serve a diverse set of industries, ranging from general utilities to water treatment, microelectronic, power plant, chemical, marine & offshore and process automation.

Building on the ever-reliable Singapore brand, our core management team is led by Singaporeans and we strive to become the leading OEM supply chain center in the region through forging new partnerships with experienced overseas producers.

OUR MISSION

The company shall provide a fair, healthy and positive work environment with a growth mindset for all team members.

All employees shall proclaim ownership of their roles in the organisation. We shall work together as a cohesive team, strive to hit sales revenues target and achieve positive profit growth.

OUR CORE VALUES

We shall work cohesively as a team to provide professional one-stop engineering services and solutions, with the aim of maximising benefits for our partners and customers.

OUR BUSINESS SEGMENTS

At Pipeline Process & Systems, we walk the journey with our valued customers through every phase and development of their projects.

Our three departments — marketing and sales, technical as well as operation — form the core pillar of our business. They are the main driving force behind our reach into the industries, in which we have earned our outstanding credential through our sound expertise for the following market segments:

- Building Services
- Chemical / Petrochemical
- Fire Protection
- Food & Beverage
- Marine
- Microelectronic
- Municipal Water & Waste-Water
- Oil & Gas
- Pharmaceutical
- Power Plant

Our excellent reputation is also built upon our ability to offer an extensive range of high quality products from our group of producers with whom we had a long-standing and valuable relationship with.

	Power Generation	Industrial Automation	Mining / Steel Mill	Municipal Water & Water treatment
	Solar		Microelectronic	
			Paint	
			Pharmaceutical	
			Pulp & Paper	

DEDICATION

The team you can rely upon

In this complex engineering environment, we may not have the answers all the time. Our dedicated team, however, is committed to work hand-in-hand with you to seek the solution that will best meet your business needs.

Working closely with our esteemed producers, our dedicated teams make every effort to share key expertise and experience with our valued customers. We go above and beyond to ensure that every exchange with our customers are as smooth and pleasant a process as possible.

Finely attuned to our customers' needs, we strive to provide competitive prices and profound solutions. Maximising customers' profit growth is equally important to us and we are always ready with our one-stop engineering services, technical support and our extensive engineering supply chain network.

Ready stocks in our Singapore office translates to an added advantage of swift turnaround time in sales enquiry and fast delivery of our products to our local and overseas customers.

RELIABILITY

Products to always meet your demand

Our technical sales and operation teams provide responsive and steadfast support, be it in quality monitoring of incoming and outgoing products, or efficient order management.

Our excellent supply chain partners are armed with vast experiences in production and product know-how. They are well-equipped to offer a wide range of quality valves such as manual valves, on/off control valves, process flow control valves, pressure control and safety valves, as well as flow, level, temperature and pressure instruments.

Be it local or overseas projects, we communicate and work closely with both customers and partners to constantly improve on product quality, operations and logistics support.

Our established producers are dotted across the globe - China, Germany, India, Italy, Singapore, Taiwan, United Kingdom and United States.

We are seeking to expand our distribution network into regional markets while forging new partnership with overseas producers, thereby continually adding value to our existing supply chain network.

We are also moving towards developing a tripartite among Pipeline Process & Systems - Customer - Producers, where all three parties benefit from the relationship.

 Relief, Safety Relief, Pressure Reducing Valves	 Water, Weather & Solar	 Pneumatic Actuators, Solenoid Valves, Sensors, Positioner
 Forged & Cast Steel Gate, Globe, Check & Butterfly Valves, Water Control Valves	 Ball, Gate, Globe, Check, Dual Plate Check, Strainer, Butterfly Valves	 DP V-Cone Flow Meter, Single Point Insertion / Full Profile Insertion Mag Meter, Propeller Flow Meter, Ultra Mag Meter
 Flow, Level, Pressure & Temperature Process Instruments	 Vibration Monitoring	 Authorized Distributor Flow Control, measurement solution
 Seismometers & Accelerometers	 Y-Strainer, Filtration	 Telecommunications, wireless telemetry, System Integration

SOLUTIONS FOCUSED

Worth your consideration

When it comes to solutions, we are worthy of your consideration, because we deliver.

It does not matter whether your company is a Small and Medium Enterprise (SME) or Multinational Corporation (MNC), our technical and sales team works diligently with our valued customers right from their initial enquiry. This is to ensure that technical requirements are met.

Our dedicated teams have been working closely with our group of reliable producers and have successfully delivered many solutions-based track records in the past years.
